

Assessment of the Higher-Order Structure of Formulated Monoclonal Antibody Therapeutics by 2D Methyl Correlated NMR and Principal Component Analysis

Title	Assessment of the Higher-Order Structure of Formulated Monoclonal Antibody Therapeutics by 2D Methyl Correlated NMR and Principal Component Analysis
Publication Type	Journal Article
Year of Publication	2020
Authors	Arbogast, LW, Delaglio, F, Brinson, RG, Marino, JP
Journal	Current Protocols in Protein Science
Volume	100
Issue	1
Start Page	e105
Abstract	Characterization of the higher-order structure (HOS) of protein therapeutics by 2D methyl correlated NMR and principal component analysis (PCA).
